DETAILED ACTION

Claims 1-19 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to compound of formula I, III, IV, V and VI, namely triazines, classified in class 544, subclass 219.
- II. Claims 12-14, drawn to method of use of compound formula I, III, IV, V and VI as stabilizers I for various polymeric materials, classified in class 524, subclass 100 and others depending upon preferred embodiment.
- III. Claims 15-19, drawn to various compositions for stabilizing materials, classified in class 254, subclass various depending upon the material to be stabilized.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, as evidenced by the prior art cited in the specification on page 1, 12 and 13, the process of using the product can be practiced with different product of prior art. Furthermore, the product as claimed can also be used in a materially different process of using that product as evidenced by applicants claims as well as prior art cited in the specification.

In addition, there is two way distinctness as the compound (Invention I) may be used in more than one method and further the organic polymer composition may be stabilized by compounds other than those of Invention I as shown in instant specification and prior art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

In view of distinct nature of the invention, the restriction is set forth in writing.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
